DESCRIPTION OF INVESTMENT OPTIONS

Target Date Funds-

Target Date funds provide an efficient and cost-effective way to invest in a broadly diversified retirement portfolio that periodically adjusts its asset allocation over time. These periodic adjustments result in a gradual change in asset allocation, where the allocation to stocks is greatest when you are farthest away from retirement and is reduced as you near retirement. There is no need to adjust your investments as your time horizon changes. Your Target Date Fund does the work for you, moving your investments to the appropriate allocations through the course of your career.

To select a Target Date Fund, simply choose the fund appropriate for your age (using the chart in *Section D* on the front of this form).

The Target Date Fund appropriate for your age is your default investment option if you don't specify any other allocation.
